BLUEPRINTS

AND SPECIFICATIONS

Complete working Blueprints and detailed Specifications for each home in this book are available to you immediately. The plans are accurately drawn to eliminate costly extras in home building. You will avoid disappointments and unseen extra expenses by using our complete Blueprints and Specifications. In addition, you get a better home because all the common structural errors have been removed. All plans have been proven by actual use in virtually every section of the country.

The plans conform to the general re-

quirements of lending agencies and include the following drawings for each design: Basement and Foundation Plan, Floor Plans, Four Elevation Drawings, Wall Cross-Section and Cupboard Details. Blueprints of the homes illustrated in this book are immediately available to you through your Lumber Dealer. After selecting the plan best suited to your needs come in and talk to him about it.

Build your home the efficient way. Order the necessary working blueprints and specifications from your local lumber dealer.

FOUR AND ONE-HALF ROOMS

17,300 CUBIC FEET

The Leeds

BALANCE, proportion and pleasing exterior design characterize this attractive hip-roofed one story home. The horizontal bars in all windows not only add charm to the style of the house, but also make for easy cleaning. The floor plan is practical and distinctive.

Instead of a dining room, there is convenient dining space connected directly with the kitchen. With its two bedrooms and connecting hall, this will be a typical, comfortable home for the family of moderate means, and a home in which the owner can take real pride.

Classification 146-160
Basement Volume 7,000 Ft.
Main Volume 8,000 Ft.

FOUR AND ONE-HALF ROOMS

18,800 CUBIC FEET

The Rogers

THE Rogers design has an unusually attractive exterior and while it is small on its foundation and totals but 896 square feet of floor space, it nevertheless provides all the space necessary for a small family. It is an attractive investment for the home owner with a modest income. The central hall connection with all of the rooms is an important and unusual feature of this home. The up-to-date kitchen is perfect for the efficiency-minded housewife and is designed to accommodate all the necessary equipment and yet leave space for a breakfast table and chairs. All rooms have cross-ventilation.

Classification 348-060
 Basement Volume 7,500 Ft.
 Main Volume 8,000 Ft.

FOUR AND ONE-HALF ROOMS

21,500 CUBIC FEET

The Davis

THE Davis plan is worth studying when seeking a house that is both economical to build and attractive in design. This home will fit a small lot. A picture window in the well-shaped living room gives it an up-to-date look from inside as well as outside. The combination kitchen and dining room will save the housewife many a step for everyday use. Here indeed is a room upstairs for future expansion. This is a home to build for convenient room arrangement and economical cost.

Classification 147-760
Basement Volume 7,000 Ft.
Main Volume 8,000 Ft.

FOUR ROOMS AND DINETTE

18,600 CUBIC FEET

The Drake

THE pleasing stone covered entrance of the Drake bids a welcome to the comforts offered by its modern design. A special feature of this plan is the extension of the dinette adjoining the kitchen which provides room for seating six at the breakfast or noonday table. The kitchen is arranged with a built-in L-shaped cabinet offering maximum efficiency. The two bedrooms and bath are conveniently arranged to form a unit apart from the living quarters of the house. This attractive home with its stone exterior will always be in good taste because of its simplicity.

Classification 553-560
Basement Volume 7,000 ft.
Main Volume 8,000 ft.

FIVE ROOMS

18,300 CUBIC FEET

The Mercer

IN the Mercer you have an unusually attractive home suited to the needs of the average family. The large combined living and dining room with its picture window alcove, the three bedrooms and the efficient kitchen are its special features. Attention is called to the many closets which provide convenient storage space. No detail for comfortable living has been overlooked in the planning of this beautiful home. The owner of a home like this may well feel proud because it is truly an attractive home.

Classification 551-660
Basement Volume 7,500 Ft.
Main Volume 8,500 Ft.

FIVE ROOMS

17,680 CUBIC FEET

The Kermit

THE three bedroom hip-roofed bungalow is becoming one of the most popular homes because of its low construction cost. The Kermit design not only has three bedrooms with individual closets but has a linen, kitchen utility, and guest closet as well. The living room is rectangular in shape with plenty of wall space permitting a good arrangement of furniture. The Kermit home has a very modern exterior and its well-planned interior is suitable for the average family. Good housing at reasonable cost is the achievement of this design.

Classification 547-780
Basement Volume 7,000 Ft.
Main Volume 8,000 Ft.

FIVE ROOMS

19,250 CUBIC FEET

The Vincent

HERE is a modern home of five rooms with the efficiency of six rooms, complete with all the comforts and conveniences needed for good living. Thoughtful planning was used to make this home suitable for either a small family or a large family. It can easily be made into a three bedroom home by using the room adjoining the kitchen as an extra bedroom. As an alternate arrangement this room can be used as a den or dining room. It is difficult to find a plan that has so many good features. For example, the large living room with its picture window, the well-planned kitchen with dining space, the central hall with access to all rooms. This charming compact dwelling will do credit to almost any location.

Classification 248-570
Basement Volume 7,500 Ft.
Main Volume 8,500 Ft.

FIVE AND ONE-HALF ROOMS

19,500 CUBIC FEET

The Traverse

THIS snug shingled home is a modified Early American type with a comfortable and efficient floor plan. The spacious living room has a wide landscape window of modern design as are all the windows in this neat plan. The large kitchen is designed for efficiency and has a convenient dining space, a feature that appeals to the busy housewife. The outstanding feature of this design, of course, is its flexibility. The two bedrooms can be increased to three very easily by using the rear middle room as a bedroom instead of a possible den or dining room. The bedrooms have complete privacy and are all accessible from the central hall and all have ample closet space. Here is a home that is easy to own and easy to live in.

Classification 250-660
Basement Volume 7,500 Ft.
Main Volume 8,500 Ft.

FOUR ROOMS AND DINETTE

16,880 CUBIC FEET

The Clyde

WITH only four rooms, the efficient kitchen and dinette arrangement makes this home equal to one of five rooms. The dining area, with its pleasant window opening to the garden, is large enough to accommodate a full dinette set. The modern kitchen equipment is arranged so that everything is at the housewife's finger tips. The bedrooms are well-planned and each has a large closet. Conveniently located between the two bedrooms is the bath. This is the home to build for convenient room arrangement, pleasing appearance and low cost.

Classification 546-960
 Basement Volume 7,000 Ft.
 Main Volume 7,500 Ft.

FOUR AND ONE-HALF ROOMS

19,896 CUBIC FEET

The Weeks

SIMPLICITY is the keynote to the charm of the exterior of the Weeks design. The vertical siding in the gable makes a nice contrast with the horizontal siding used on the remainder of the structure. The rooms are all of comfortable size with ample closet space. Every foot of space has been carefully utilized for utmost convenience.

The kitchen with its well-planned cabinet and sink under window arrangement leaves nothing to be desired. The side entrance door leads to the basement as well as to the kitchen. Good housing with reasonable costs is the achievement of the Weeks design.

Classification 147-800
Basement Volume 7,000 Ft.
Main Volume 8,000 Ft.

FOUR AND ONE-HALF ROOMS

19,200 CUBIC FEET

The Chase

HERE is an attractive minimum home with two bedrooms. A handy attic renders the Chase adaptable to your every need. The kitchen is large, with ample dining space, and the built-in L-shaped cabinet offers maximum efficiency. The rooms are all a nice size, well lighted, and with cross ventilation. Closet space has been well provided. Above all, this delightful home is not expensive to build and is easy to finance.

Classification 145-620
 Basement Volume 6,500 Ft.
 Main Volume 7,500 Ft.

FOUR ROOMS

13,440 CUBIC FEET

The Ardock

HERE is a practical and attractive home for a family of moderate income. The rooms are arranged to eliminate as much waste space as possible. The kitchen with its dining space is an arrangement which will save the busy housewife many steps. Another convenient feature of this plan, the Ardock, is the small hall which is accessible from every room. There is also the ever-popular side service entrance that opens into the kitchen and provides easy access to the basement. The Ardock is popular because of its basically sound design and compact outline.

Classification 538-300
Basement Volume 5,500 Ft.
Main Volume 6,000 Ft.

The Stewart

FOUR ROOMS AND DINETTE 15,380 CUBIC FEET

A GOOD bungalow, like the Stewart, is the best investment in an inexpensive home that can be made. Its neat, trim lines are widely appreciated. Soundly planned, it has high resale value.

FIRST FLOOR PLAN THE STEWART DESIGN

Classification 941-640
Basement Volume 6,000 Ft.
Main Volume 6,500 Ft.

The Stanton

FIVE ROOMS 16,900 CUBIC FEET

THIS is an alternate floor plan of the Stewart. The Stanton has the same good points for an equally small cost of construction. They share the identical attractive exterior.

FIRST FLOOR PLAN THE STANTON DESIGN

Classification 943-930
Basement Volume 6,500 Ft.
Main Volume 7,000 Ft.

FIVE ROOMS

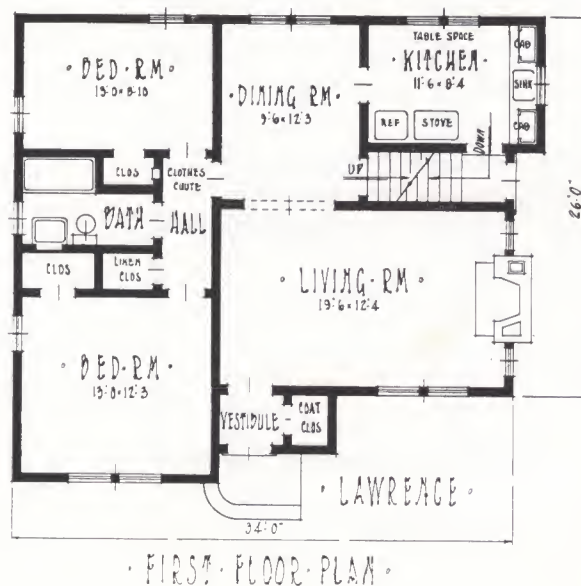

22,700 CUBIC FEET

The Lawrence

SPECIAL front gable treatment with vertical matched boards adds an appealing value to this inexpensive home. The rooms are well planned in ample proportions.

The family size living room with fireplace is especially noteworthy. An arch leads to the dining room. A bedroom hall avoids direct entry from other rooms. Upstairs rooms may be finished, if ever desired, in the attic. Storage is reached by stairs now in the plan.

Such a low-cost home does not often afford so much space and attractive design.

Classification 955-380
 Basement Volume 8,000 Ft.
 Main Volume 9,000 Ft.

FOUR ROOMS AND DINETTE

17,900 CUBIC FEET

The Sawyer

THE Sawyer expresses its distinctive personality in the unusual shutters adorning the front windows, and a neat iron railing on the front stoop.

In spite of the simplicity of this cozy little home, all of the details which combine to make it entirely livable and of enduring value have been accounted for.

Noteworthy is the fact that every room has excellent cross ventilation, yet the wall space has been closely guarded with an eye to better furniture arrangement. The dining area is set off from the kitchen by a counter that is useful as well as ornamental.

Classification 943-770
Basement Volume 6,000 Ft.
Main Volume 7,000 Ft.

The Vernon

FIVE ROOMS

17,650 CUBIC FEET

PLEASINGLY Cape Cod in style, the Vernon has large capacity in a small package. Five rooms are on one floor; stairs point to expansion into another room in attic space.

FIRST FLOOR PLAN VERNON

Classification 942-770
Basement Volume 6,000 Ft.
Main Volume 7,000 Ft.

The Victor

FOUR ROOMS

14,350 CUBIC FEET

MORE limited funds will build the same attractive exterior as the Vernon, but with smaller dimensions providing four neat rooms and keeping the attic in reserve. The Victor is modern and convenient.

FIRST FLOOR PLAN THE VICTOR DESIGN

Classification 936-220
Basement Volume 5,000 Ft.
Main Volume 5,500 Ft.

FOUR ROOMS

15,600 CUBIC FEET

The Kindred

THE Kindred has four well-lighted rooms each having cross ventilation. The living and sleeping quarters are separated by a small hall, allowing all possible quiet and privacy. The kitchen, with its informal dining space, is planned to save the housewife unnecessary steps and it is sufficiently large to accommodate a full sized breakfast set. The plans provide for abundant closet and storage space. With its large living room, this home is made doubly attractive by the well designed picture window. This is a home to be proud of.

Classification 543-840
Basement Volume 6,000 Ft.
Main Volume 7,000 Ft.

FOUR AND ONE-HALF ROOMS

17,700 CUBIC FEET

The Weaver

IF YOU have an idea that all small houses must have a pinched and meager look, study the Weaver design. This two bedroom plan is compact and easy to build, a point of interest to those who have a budget to meet. High corner windows give privacy to the bedroom. There is hall space that keeps people out of rooms which in many small homes are only hallways. The picture window in the living room and the modern kitchen arrangement with its dining area, are especially attractive features. Its very adaptability to any surroundings makes this cozy hip-roofed home a good buy.

Classification 244-260
 Basement Volume 7,000 Ft.
 Main Volume 8,000 Ft.

The Dawson

FIVE ROOMS

16,800 CUBIC FEET

BECAUSE it is unusually complete and open to very modest means, the Dawson is an outstanding value. Isn't it neatly attractive inside and out?

Classification 942-870
Basement Volume 6,500 Ft.
Main Volume 7,000 Ft.

The Crosby

FOUR ROOMS

15,900 CUBIC FEET

PARING the building cost has not seriously deprived the home in the Crosby. It lacks only the dinette found in the Dawson.

Classification 940-700
Basement Volume 6,000 Ft.
Main Volume 6,500 Ft.

FIVE ROOMS

20,340 CUBIC FEET

The Griffin

A CLASSICAL front entrance graces this charming home. Nothing has been omitted in its practical floor plan. Entrance space with coat closet, living room, dining room, kitchen, two bedrooms and bath are planned for your convenience. Attention is called to the living and dining rooms separated by a well-proportioned and attractive arch. An abundance of large roomy closets has been provided for ample storage space. The exterior of this home, the Griffin, may either be shingled as shown above or finished with wide siding.

Classification 551-580
Basement Volume 8,000 Ft.
Main Volume 8,500 Ft.

SIX ROOMS

17,950 CUBIC FEET

The Bruce

IN SPLENDID taste in any surroundings, this fine Cape Cod home actually has six rooms. The foundation is only 30' x 26', yet not one of the rooms has been sacrificed in size.

The Bruce is well balanced with central halls, lavatories and linen closets on both floors.

As an investment in home enjoyment, the market value will remain high.

Classification 961-430
Basement Volume 6,500 Ft.
Main Volume 11,000 Ft.

WHY YOU SHOULD BUILD NOW!

Home ownership has always been the best investment for the average family. At the end of a given period of time, it is possible to have a clear title to a piece of property which will always have a market value. Because of the fact that building costs are steadily moving upward, there is no better time to build than the present.

The first step in the ownership of a home, after the lot has been decided upon, is the selection of a good plan. You will find many attractive and economical homes in this book that will fit your needs and requirements. It is important that your home should have (1) beauty of design (2) good room arrangement (3) economy of space and (4) low cost of upkeep.

In conformance with present demands of prospective home builders, as ascertained in national surveys, many of the homes in this book show the modern improvements that are demanded. The fundamentals of good design and planning have not been overlooked.

The amount of money available and construction costs will largely determine the size of the home and the number of new conveniences that may be included in the plan. Information on financing and home building costs can be secured from us, your lumber dealer. Remember, it is better to pay on a home of your own than to pay rent.

A WORD ABOUT "G. I." LOANS

The Servicemen's Readjustment Act (commonly called the "G.I." Bill of Rights) includes provisions for the most extensive home procurement program on record. It gives the serviceman the most economical home financing plan ever offered anyone. Servicemen are urged to contact their local dealer, lending agency or the nearest office of the Veteran's Administration for complete details.

APPROXIMATE COSTS

The price of a house varies in different parts of the country, depending on local conditions and the kind of materials used.

Every home in this book has a "Classification Number" from which the approximate cost of that home, exclusive of the lot and the garage (if detached) can be determined, as:

Classification 161-171

To arrive at the total construction cost, drop the first and last numbers. You then have 6117 which is the list price of that home in dollars. Your Lumber Dealer can give you the percentage to add to this list price for this community, as well as other valuable cost information.

FINANCING YOUR HOME

How should you go about financing your home? In the first place, you should know what price you can afford to pay for a home and how much you can comfortably pay each month in paying for it. The most advantageous plan for home financing provides for monthly payments on principal and interest over a given period of time, from 10 to 25 years. This is a painless, sensible way to pay for a home in easy installments just like rent, and in some cases actually cheaper than rent.

The following charts have been designed to eliminate the necessity of calculations in determining the equal monthly payment necessary to pay off a loan of a given size. The interest rate in Table A is 4%, the interest rate in Table B is 4½%, the interest rate in Table C is 5% and the interest rate in Table D is 5½%, and for terms from 10 to 25 years. The payment shown in the table is the minimum uniform payment necessary to pay off the loan completely within the stipulated time.

MONTHLY PAYMENT TABLES

Showing monthly payment of interest and principal required to pay off a loan completely within a given number of years.

TABLE A — 4% INTEREST
